## DETAILED ACTION

1. This office action is in response to communication filed on 10/2/2006.
2. Claims 1-4, 6-10, 12-13, 15-21, 23, 27-30, 34-36, 40, 41 and 43-51 are presented for examination.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 1-4, 6-10, 12-13, 15-21, 23, 27-30, 34-36, 40, 41 and 43-51 are rejected under 35 U.S.C. 103(a) as being unpatentable over **article titled, “recommend-it.com”** in view of “How MileNet Works” hereinafter MileNet .

With respect to claims 1-4, 7-13, 15-16, 19, 27, 30, 34-35, 40-41, 43-49, 50-51, recommend it.com teaches a method of marketing comprising the steps of a first party recommending a marketable entity, the recommendation comprising forwarding of a first e-mail message to a second party, the first message comprising a personalized referral for the marketable entity and a first set of data, the first set of data comprising a first serial number and a first URL link to a first web site having an offer to transact for the marketable entity (i.e. the first user will send an e-mail to a friend or colleague detailing the site and would include a short description identifying the recommended software and personal annotation)(page 2); correlating the first set of data in the first e-mail

message to data within a database (page 2); updating the database with an e-mail address of a second party provided by the first party (pages 1-4); forwarding the first e-mail message to the e-mail address of the second party (see page 4).

With respect to the marketable entity being selected from a group consisting of goods and services. Recommend.it.com teaches recommending a particular software called WebDeck. Recommend.it.com doesn't specifically teach selecting from a group of goods or services. Official Notice is taken that it is old and well known to allow users to select different products or services in order to provide variety. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included selecting from a group consisting of goods and services in order to achieve the above mentioned advantage.

With respect to providing data related to a reward and providing the reward to the first party if the second party transacts the exchange from the marketable entity. MileNet teaches a pyramid type of incentive wherein the first user will increase their MileNet points based on friends and family installing and using Milenet. By the second user using and installing MileNet in essence, he is transacting or performing an activity at the website. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included providing data related to a reward and providing the reward to the first party if the second party transacts the exchange from the marketable entity in order to motivate the users to increase their rewards based on their friends and families actions.

Claims 6, 17-18, 20, further recite that the link is accessible through a token in the form of a first icon visible in the message. Official notice is taken that it is old and well known in the computer related field to have a token in the form of an icon that is visible in the message in order to represent a function, object or program. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included a token in the form of a first icon visible in the message in order to make file navigations and manipulation easier.

Claims 21-23, 28-29, 36 further recite crediting an account within a database and recording the reward credited. Official notice is taken that it is old and well known in the business related arts to credit an account because such a modification would provide an easy and efficient way to reward a customer. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included crediting an account within a database and recording the reward credited in order to obtain the above mentioned advantage.

**Response to Arguments**

5. Applicant's arguments with respect to claims 1-4, 6-10, 12-13, 15-21, 23, 27-30, 34-36, 40, 41 and 43-51 have been considered but are moot in view of the new ground(s) of rejection.
